

SOBERANES FIRE

CA-BEU-003422

OPERATIONAL PERIOD

TUESDAY AUGUST 16TH 0700

to

WEDNESDAY AUGUST 17TH 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Soberanes	2. Operational Period: Date From: 8/16/16 Date To: 8/17/16 Time From: 0700 Time To: 0700				
3. Objective(s): <u>Management Objectives</u> <ul style="list-style-type: none"> Provide for and maintain public and first responder safety by utilizing the incident safety analysis process. Protect all critical assets at risk to include the redwoods, historical assets within the affected area, infrastructure and improvements, watershed, and transmission lines. Utilize tactics that promote protection of sensitive natural and cultural resources in the Ventana Wilderness. It is the Unified Incident Commanders' Leader's Intent to ensure collaboration at all levels of the incident. Be financially responsible for all management and fire suppression tactics. Foster and enhance community and political relationships. All management actions and efforts will be focused on serving, safeguarding and protecting the citizens and natural resources of Monterey County. <u>Control Objectives</u> <ul style="list-style-type: none"> <input type="checkbox"/> Keep the fire inside the current perimeter in the Carmel Zone <input type="checkbox"/> Keep the fire North of the Nacimiento-Fergusson Rd <input type="checkbox"/> Keep the fire West of Carmel Valley and Reliz Canyon <input type="checkbox"/> Keep the fire East of Hwy 1 					
4. Operational Period Command Emphasis: Perimeter Control , Structure Defense, Improve Contingency Lines, Hold and Improve Existing Control Lines					
General Situational Awareness S. T. O. P. Stop Think Organize Proceed					
5. ASSIGNMENT LIST (ICS 204)

[illegible]

ASSIGNMENT LIST (ICS 204)

[illegible]

Soberanes Fire Weather Forecast

FORECAST NO: 24

NAME OF FIRE: Soberanes

PREDICTION FOR: 0700 Tue- 0700 Wed

UNIT: CA-BEU/LPF

SHIFT DATE: 8/16-8/17

SIGNED: *Matt Mehle*

TIME AND DATE

Incident Meteorologist- Matt Mehle

FORECAST ISSUED: 1900 8/15/16

WEATHER DISCUSSION: The typical morning marine layer will peel back to the coast by mid-morning. Conditions above the marine layer will start off mild and dry, but areas below the marine layer will gradually warm and dry through the day. Away from the immediate coast, temperatures may be a few warmer than Monday. Winds will be more southerly today, but for the most part remain light to moderate. Gusty sea breeze possible during the afternoon in Sur Zone. Marine layer returns tonight with slightly better humidity recoveries, even on ridges.

WEATHER FORECAST FOR TUESDAY:

WEATHER: Morning clouds, fog and possible drizzle pulling back to the coast 10-11am. Clouds will linger along Sur Zone through mid to late afternoon then clear south of Pt Sur. Transport winds will push smoke to the E - NE.

TEMPERATURES: 86-92 interior/ridges 79-86 lower slopes...Hwy 1 70-75.

24 HR Trend (2-4 warmer)

HUMIDITY: Coast 45-60%...above 2000 ft/interior 15-25%.

24 HR Trend (little change)

20 FT WINDS:

RIDGETOP - Sur Zone – Southeast 2-4 mph gusts 6 mph becoming southwest during the afternoon at 5-10 mph. Gusts to 15 mph Hwy 1. **Seco Zone** –Southeast 2-4 mph in the morning becoming 3-6 with gusts 9 mph in the afternoon.

SLOPE/VALLEY - Downslope/downcanyon 3-6 in the morning becoming ...Seabreeze and upcanyon 1400-2000 hours 4-8 mph gusts 10-12 mph.

Sur Zone/hwy 1 – light northeast/downslope in the morning switching west-southwest & gusty

Marine Layer: 1500-1800 feet.

WEATHER FORECAST FOR TUESDAY NIGHT:

WEATHER: Becoming mostly cloudy below 1800 feet, especially Sur zone and Carmel Valley. Smoke settling over the lower elevations. Coastal fog and patchy drizzle.

TEMPERATURES: 65-69 above 1800 feet. 52-58 along Hwy 1 and up the Carmel Valley.

HUMIDITY: Moderate recovery below 1800 feet 70-90%...25-40% above 1800 feet. Peaks may recover early then dry through sunrise. 90-100% near highway 1.

20 FT WINDS:

RIDGETOP - Sur Zone – North-Northeast 4-6 mph gusts 10 mph. **Seco Zone**– north-northeast 3-6 with gusts 8 mph.

SLOPE/VALLEY – Evening upcanyons 4-7 mph...becoming downcanyon 2-4 mph overnight.

Sur Zone - downcanyon up to 10 mph overnight.

Marine Layer: 1500-1800 feet.

Extended Forecast: Persistent pattern will remain in place as night and morning clouds will be common clearing back to the coast each afternoon. Temperatures moderate through the week.

Portable RAWS 163.350 Tone 0032 for H3, Tone 0033 Piney Creek, Tone 0029 for Blue Rock, Tone 0038 Chews Ridge, Tassajara 0039, Tone 0031 Memorial.

INPUTS

WEATHER SUMMARY Slightly warmer and drier than yesterday.

PLEASE REVIEW INCIDENT METEOROLOGIST FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL

For today, above the marine layer the fire will be active with the continued poor RH recoveries. As the fire progress to the upper third of the slope it will be more exposed to prevailing winds and can make runs to the top and along ridgelines. The fire should not be active below the marine layer (1500') until it pulls away from the coastline however, during the last two weeks active burning in fine fuels has been observed within the marine layer. Expect poor overnight humidity recoveries and the potential for a second burn period in the pre-dawn hours. The fire will continue to slowly back down into the steep and rugged terrain between Ventana Double Cone and the Carmel River (Branch III) with short uphill runs back into the black. Suppression efforts in Branch III and have checked the spread of fire above the Carmel River. Heavier fuels at the bottom of moist drainages will slow the progression of fire across creeks. When the fire does cross a drainage, expect a slope reversal and a precipitous increase in ROS, intensities and a continuous build of momentum until it reaches a ridgeline. As the wind shifts this afternoon, anticipate the fire changing directions and rates of spread on the upper third of ridge tops. The fire is burning primarily in a mix of brush and an oak understory. Grass fuels in the area have cured and heavier dead fuel moistures are very low. **Live fuel moistures are at or near critical levels (LFM = 70%). ERC's are at the critical 97% percentile** and we have seen large fire growth on this fire at these levels.

Optimal Alignment, Peak Burning Conditions

Probability of Ignition = 89% Spotting Distance= up to 1/2 Mi. ROS 90-110 ch/h for uphill runs
Fine Dead Fuel Moisture = 3% 10hr Fuels= 3-4% BI 132 ERC 78 1-2 ch/hr for backing

SPECIFIC

Carmel Zone BRANCH I, II, IX

No forward fire progression is expected. Interior islands and heavier fuels will continue to burn out.

Seco Zone BRANCH III, IV, V Very minimal observed fire behavior east of the Ventana Double Cone. The fire continues to hold on the north side of the Carmel river drainage. Monitor for roll out in this steep and rugged terrain. Roll out on the north side of the drainage will result in an uphill run back into the main fire. Fire established on the south side of the Carmel drainage will run uphill in continuous fuels with rates of spread between 80-85 ch/hr, and 15 -20' flame lengths in brush fuels.

Sur Zone BRANCH VII, VIII

In DIV P/O, no forward fire progression is expected. However, rolling material will continue to challenge holding efforts in DIV O and re-burn potential exists in all divisions. In DIV N, expect the fire to flank to the south with upslope runs threatening the control line where fuels and topography align. Afternoon winds will be favorable for firing operations in DIV N. Expect fire activity on the lower slopes to be hampered by the marine layer in the afternoon. Fire will remain active within the thermal belt tonight.

AIR OPERATIONS

Expect the smoke and marine layer to lift around mid-morning.

SAFETY

Watch for wind increases or changes direction! Southerly flow is a change we haven't seen in a few days.

SAFETY MESSAGE

SOBERANES

16-CA-BEU-003422 – August 16, 2016 – 0700 TO 0700

ENVIRONMENTAL

MULTIPLE FIRING OPERATIONS ON THE FIRE

Watch Out

- WILDLIFE: Mountain Lions, Raccoons, Rats
- INSECTS: Bees, Ticks, Mosquitos (Monitor yourself for ticks and bites)
- POISON OAK

Mitigation

- Avoid contact with any wildlife, keep food and vehicles locked up and unavailable
- Pretreatment with DEET or other bug repellent, and wash your bedding often
- Pre and Post treatment wipes and Tecnu are available at the Medical Unit Tents

TRAFFIC

FIRE EQUIPMENT IS LARGE AND HEAVY

Watch Out

- Roads and Highways surrounding the fire will have increased traffic during the weekend
- Roads in the fire area are narrow, steep and are shared by civilian traffic
- Reports of increased fire apparatus speeds around the fire

Mitigation

- Drive with a high level of Situational Awareness and utilize defensive driving techniques
- Use road cones and signs as necessary to coordinate traffic flows on road systems
- Slow down and obey posted signs and speed limits

HUNTERS

DEER SEASON IS OPEN IN THE GENERAL FIRE AREA / HUNTERS MAY BE IN THE AREA

- WATCH OUT for hunters hiking or traversing the area
- Alert supervisors of hunters in the area
- Make notifications for appropriate Law Enforcement response if necessary

Prepared By (Communications Unit)				Incident Location							
Kevin Harper/Clay Flad(COML)				5 MILES SOUTH OF CARMEL, GARRAPATA STATE PARK, MONTEREY CALIFORNIA							

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Kx and Ix reversed.

Air Guard must be in the last channel of every plan (168.6250, PL 110.9 on TX only) Once 205 is complete, email it to comm205@fire.ca.gov or fax to the local ECC and ask them to email it for you.

DEMOB

SOBERANES INCIDENT

CA – BEU – 003422

- Resources must Check-In prior to the Demob process.
- In order to be deemed excess, supervisors must submit an ICS #213 to the Resources Unit.
- Please return all supplies and equipment, either at ICP-Toro Park or the camp assigned to, prior to reporting to Demob (ICP – Toro Park)
- Strike Team Leaders and/or Overhead personnel report to Demob (ICP-Toro Park) at the times posted on the Tentative Demob List, which is posted around the Incident Base and through the QR Reader. After receiving the #221, the STEN will report to ground inspection.

*Engines will report to ground support (Fort Ord) at the times posted. The engines will go through vehicle inspection and weed wash then wait for their STEN to meet up with them at Fort Ord.

- When the strike team and leaders are completed with ground support, the strike team will report back to ICP – (Toro Park) to finish their #221.
- Resources will get signatures from the following units:
 - Motels
 - Supply
 - Ground Support
 - Weed Wash
 - Training (If they have a trainee)
 - Communications
 - Documentation
 - Time
 - Demob
 -
- After the #221 is given to Demob, all CAL FIRE, Federal, and Local Government personnel are approved to travel back to home unit or a reassignment.
- Air Travel: For Federal resources, provide a #213 to the Demob Unit with the following information:
 - Full Name: (As it appears on Drivers License)
 - Date of Birth
 - Destination jet port and departure jet port.
 - Phone Number and Email
 - Date of Travel

FIRE SUPPRESSION REPAIR PLAN

SOBERANES FIRE: CA-BEU-003422

Fire Suppression Repair is the repair of damage caused directly by fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by fighting the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

Instructions for suppression repair during mop-up

While performing mop-up operations dozer or excavator operators will install waterbreaks on all dozer lines while dozers will install waterbreaks on secondary access roads. Dozer lines amongst the structures shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines, and waterbreaks on dozer lines situated on extremely steep slopes may also need to be installed by hand crews.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

Inventory and Mapping

Suppression overhead and other personnel will document repair needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate area in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

Objectives

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression.
- Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously closed but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damage or damages mitigation to the Fire Suppression Repair Group.
- Complete all repair work as determined by the Fire Suppression Repair Specialist prior to final demobilization.

Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks where necessary for erosion control.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- Spread brush across the disturbed areas to provide ground cover and a seed source.

- Masticators/excavators/dozers with brush rakes or grapples will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading.

Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities.
- Use cut brush – if available and nearby – to block off potential OHV access.
- Remove outboard berms created during suppression activities and incorporate into the road surface.

Watercourses

- All slash; soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent stream bank failure.

Archaeological or Historic Sites

Equipment shall not to enter archaeological or historic sites unless the operator is closely supervised by an Archaeologist or Fire Suppression Repair Specialist. Many known sites have been flagged by the incident archaeologists. Archaeological or historic sites are delineated in the field with several types of flagging colors and designs, but generally flagging that appears to be encircling a given feature must be avoided. Known flagging schemes are as follows:

CAL FIRE:	Yellow and black stripped & Orange and black stripped
U.S.F.S.	Yellow and black stripped tied with blue
Santa Lucia Preserve:	White and blue tied together & Yellow and black stripped

Waterbreaks/Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	50%+
Spacing	200 ft.	100 ft.	75 ft.	50 ft. (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

Conflicts with Suppression Activities

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. DO NOT compromise fire lines by spreading flammable material across them.

Archaeological and Historical Sites Fireline Guidance for the (NAME) Incident

Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include boulders and bedrock with mortars and cupules, holes and grinding surfaces, temporary camps containing scatters of stone flakes, and deposits of dark brown to blackish soil with shell fragments (midden) occurring in layers or mounds on flat surfaces near sources of water, along coastal areas and wetlands, along ridges and saddles, and other areas suitable for camping. Historic sites include old wooden cabins, barns, corrals and other buildings, rock foundations and historic artifact scatters. These kinds of resources are often found in the same kinds of environmental settings as prehistoric camp sites.
2. Some archaeological and historical sites have not been flagged yet. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

Forest Service Wilderness and California State Parks Special Instructions – Resource Advisor

DOZER LINES - DIVISIONS K, M, P, and CONTINGENCY LINES

- Dozer lines will not exceed 50 feet in width except for safety reasons.
- Dozer lines in Wilderness will be repaired later; construct line to minimize impact.
- Do not push brush off steep hillsides – it will be spread over the line during repair.
- Minimize removal of top soil – it will be spread back over the line during repair.
- Avoid riparian areas, seeps and springs.
- Avoid archeological sites flagged with black/yellow and blue ribbon

Wilderness Minimum Impact Suppression Tactics (MIST)

The intent of Minimum Impact Suppression Tactics is to suppress a wild fire with the least impact to the land. Fire conditions and good judgment dictate the actions taken. Consider what is minimally necessary to halt fire spread and contain it within the fireline.

FIRELINE CONSTRUCTION PHASE:

- Use cold-trail, wet line or combination when appropriate.
- Allow fire to burn to natural barriers.
- If constructed fireline is necessary, use minimum width and depth to check fire spread.
- Remove or limb only those fuels that if ignited would have potential to spread fire outside the fireline.
- Minimize cutting of trees, burned trees, and snags unless determined they will cause fire spread across the fireline or endanger workers.
- Cut brush or small trees flush to the ground; camouflage the cut surface with soil or brush.

HELISPOT CONSTRUCTION:

- Consider using a long line remote hook in lieu of constructing a helispot.
- If construction is necessary, consider natural openings, or previously used areas. Cut only what is necessary to achieve safe operating space.

INCIDENT TRAINING MESSAGE

ALL TRAINEES

Scan the QR Code or type in the link.
Form drop boxes are located @ Molera & Patriot
Camp, & Toro ICP

<https://goo.gl/jT5BaF>

Demobilizing trainees **MUST** close out with the TNSP
and bring a 225 Evaluation and signed Task Book

To close out: The Trainee AND Trainer need to be
present

TNSP Location: Toro ICP behind Check- In and
Next to Documentation

CAL FIRE INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and consider establishing Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Consider establishing a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

INCIDENT MANAGEMENT TEAM

WATER USAGE LOG

DATE: _____

Division / Group: _____

AGENCY ID / VENDOR: _____

I.e., Strike Team 1110C, Acme Water Tenders

REQUEST # _____

TURN INTO FINANCE DAILY

WATER SOURCE LOCATION	Hydrant	Open source i.e. pond	Tank	Gallons Used	Property Owner / Contact Number if known **

**Please note if you made contact with property owner and their contact.
(Use reverse side if needed.)

Information: _____

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- ☐ Objectives
- ☐ Conditions (fire environment)
- ☐ Resource assignments identified
 - ☐ Firing personnel
 - ☐ Holding forces
 - ☐ Lookouts
- ☐ Ignition plan/sequence
- ☐ Communication Plan
- ☐ Contingency Plan
- ☐ Safety issues

2. Go / No-Go

- ☐ All personnel briefed
- ☐ Weather forecast reviewed
- ☐ Resources in place
- ☐ Lookouts posted as needed
- ☐ Anchor and termination firing points identified
- ☐ Communications systems in place
- ☐ Fire behavior forecast reviewed
- ☐ Escape routes and safety zones established and made known
- ☐ Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- ☐ Division Supervisor
- ☐ Branch Director
- ☐ Operations

4. Other Notifications

- ☐ Other: _____
- ☐ Other: _____

Attach Firing Operations Checklist to ICS-214

ATTITUDE

Attitude is more important than facts.

It is more important than the past, than education, than money, than circumstances, than failures, than successes, than what other people think or say or do.

It is more important than appearance, giftedness or skill.

It will make or break a company...a church...a home.

The remarkable thing is we have choice every day regarding the attitude we will embrace for that day.

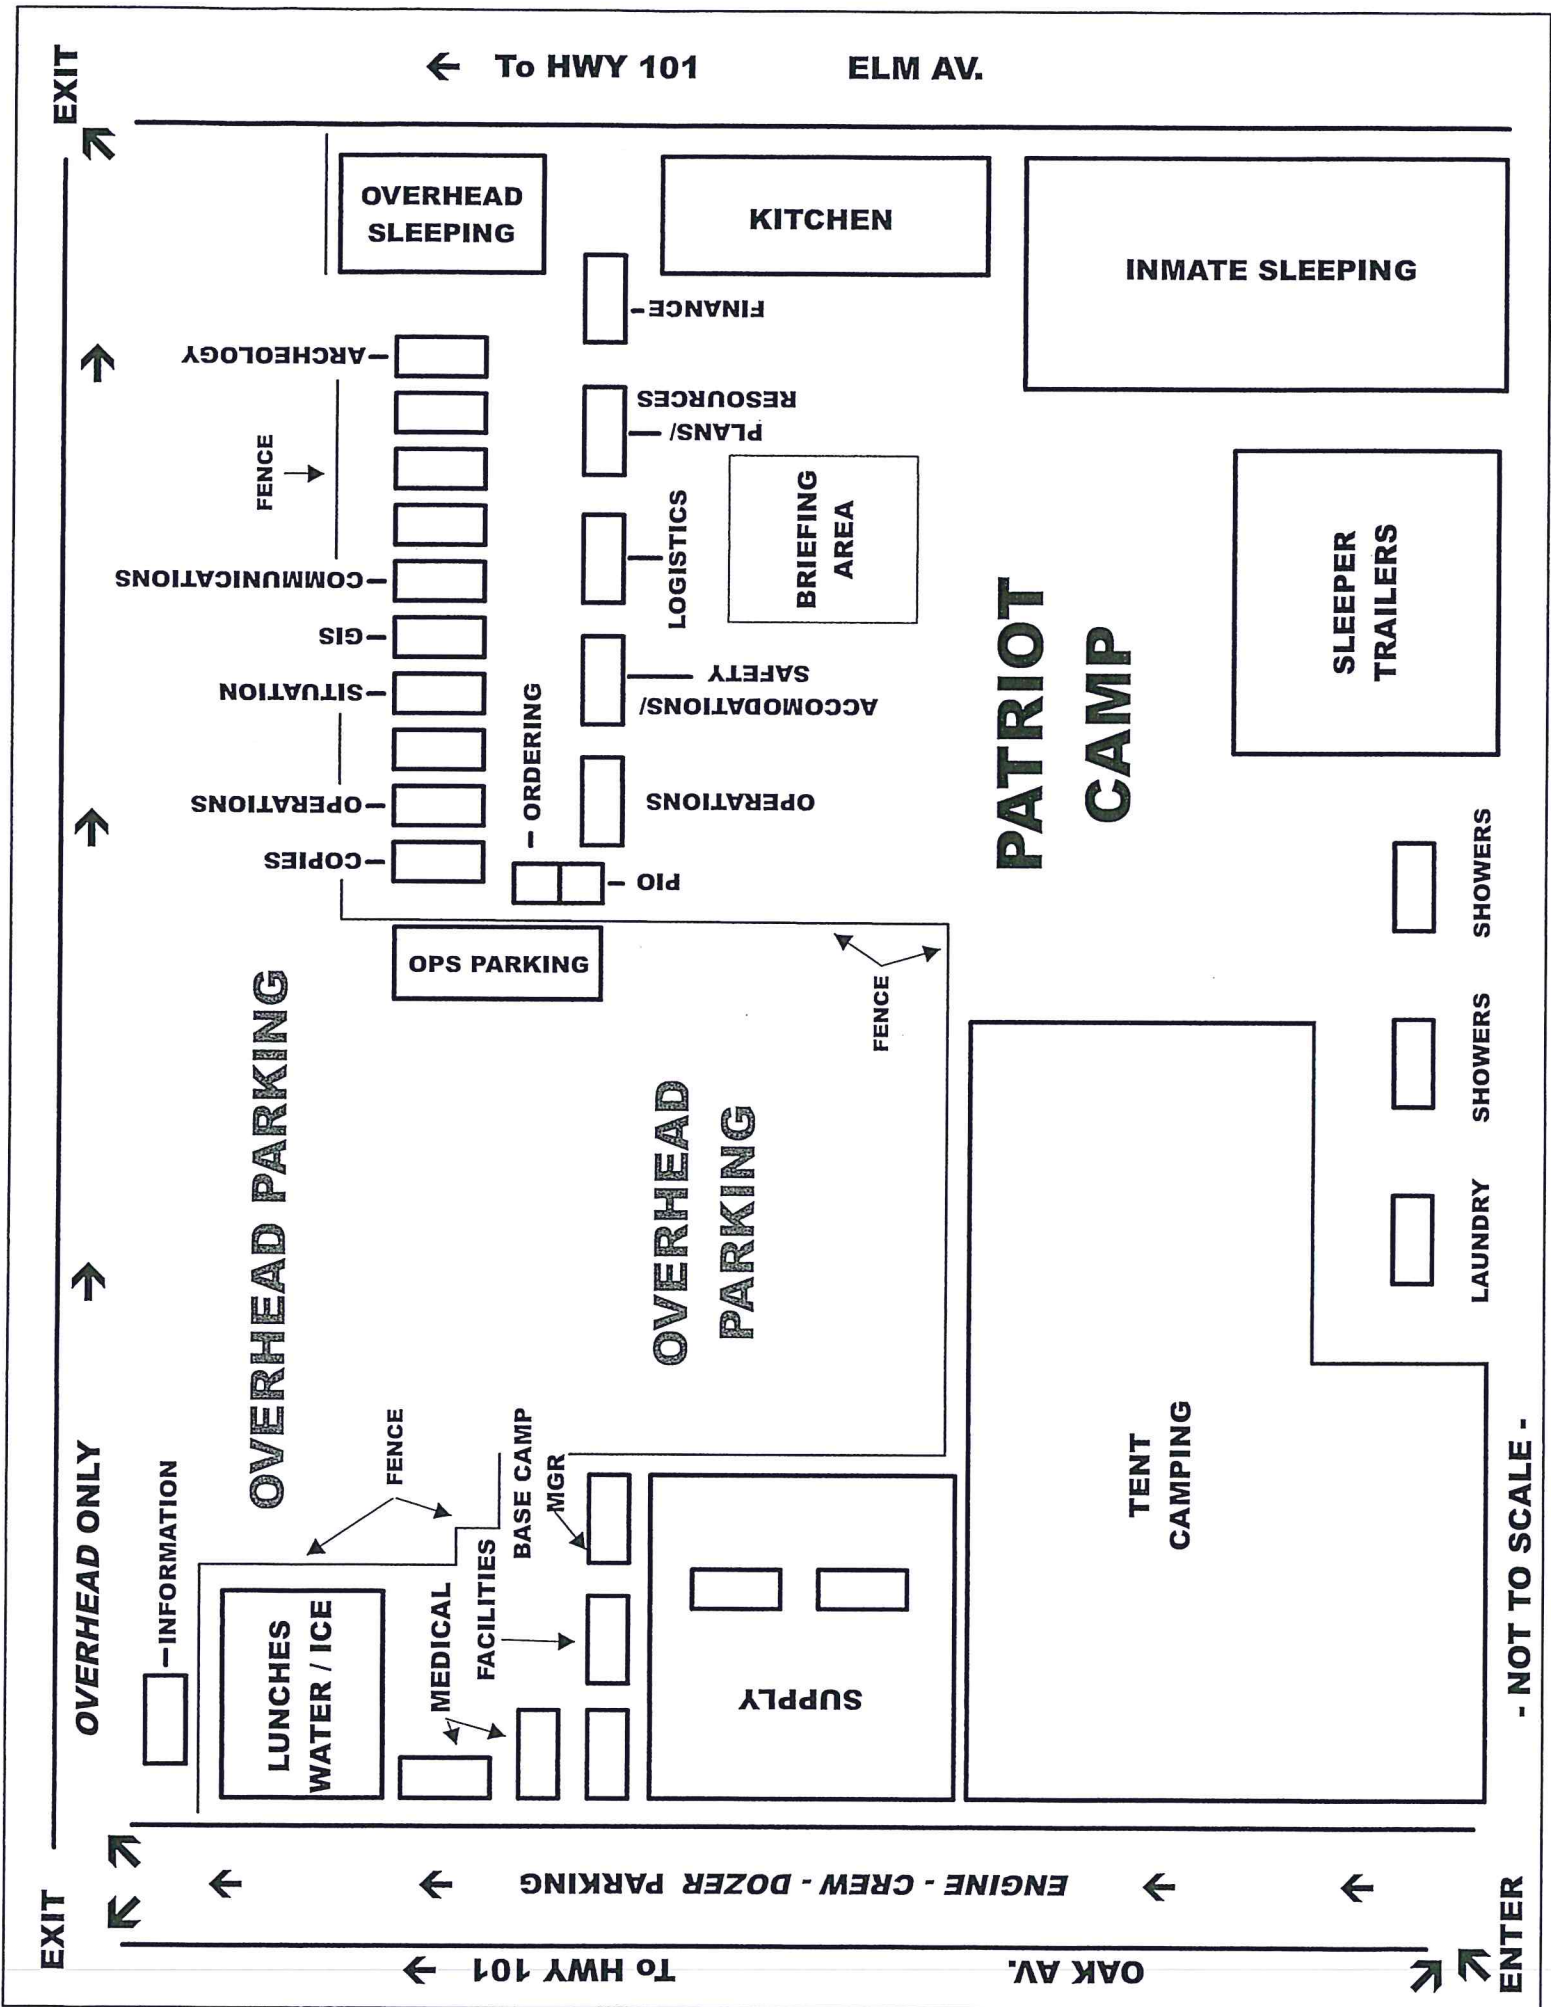

We cannot change the inevitable.

The only thing we can do is play on the one string we have, and that is our attitude.

"I am still determined to be cheerful and happy, in whatever situation I may be; for I have also learned from experience that the greater part of our happiness or misery depends upon our dispositions, and not upon our circumstances." -Martha Washington-
